ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

CONTENTS FOR 1981

Number 1

	English Page	Russian Page
CONTROL PROBLEMS, SYSTEMS ANALYSIS, AND OPERATIONS RESEARCH		
A.S. Nemirovskiy: On a Procedure for Stochastic Approximation in the Case of Dependent Noises	1	14
A.R. Belkin: Approximate Triangulation of Matrices in Problems of Ranking and Processing of Inter-branch Balance	13	26
V.K. Gorbunov: Systems Analysis of Economic and Demographic Growth	18	32
Yu.Ye. Malashenko: Synthesis of Networks with Allowance for the Dynamics of Their Development	25	43
ROBOTS AND MANIPULATORS		
P.D. Krut'ko and N.A. Lakota: Construction of Algorithms for Controlling the Motion of Manipulational Robots on the Basis of the Solution of the Inverse Problems of Dynamics	34	52
A.M. Korikov and V.G. Reznik: En Route Motion Control of a Transport Robot	41	59
QUEUEING AND RELIABILITY		
Yu.K. Belyayev: Simple Confidence Estimates of the Quantiles of Obsolescent Distributions of the Duration of Failure-free Operation	48	67
A.A. Shakhbazov: Estimation of the Reliability of a Complex System with Rapid Renewal in a Nonstationary Regime	58	77
A.V. Pechinkin: Optimal Control of Servicing in a System with an Infinite Number of Devices When There Is a Limitation on the Servicing Rate	67	86
A.V. Pavlov: A Queueing System with a Controllable Flow of Orders	76	96
Ye.I. Gordiyenko: A Model of Control of a Servicing Object in a Territorially Distributed System. II	83	103
S.L. Kuz'min: Servicing of Deterministic Flows on a Finite Interval	92	111
A. Shlosser: On Estimation of the Size of the Dictionary of a Long Text on the Basis of a Sample	97	117
G.I. Simonova: Stable Estimates of the Parameter of an Exponential Distribution	103	123
COMPUTER SYSTEMS AND AUTOMATA		
A.P. Ryzhkov: Determination of the Maximally Internally Stable Set of a Graph and the Choice Problem	111	130
Sh.Ye. Bozoyan: A Language for Description of Logic Networks	119	140
A.L. Lopukha, V.V. Sapozhnikov, and Vl.V. Sapozhnikov: Synthesis of Synchronized Automata with Self-Control of the Output State	123	144

	English Page	Russian Page
M.I. Kushnir: On the Insertion Level of Time Redundancy	128	150
P.P. Bocharov: On One Model of the Exchange of Information between a Buffer Memory of a Computer and an External Storage Device	137	160
AUTOMATIC CONTROL		
A.F. Gribov, I.B. Petrushina, and B.I. Shakhtarin: Dynamics of Synchronization with Piecewise-linear Characteristics	145	167
K.K. Zhil'tsov and I.I. Rabinovich: Automatic Control Systems of Variable Structure with Majoritary Links	148	170
BRIEF COMMUNICATIONS		
I.N. Karbovskiy: On Successive Coverings of Point Sets	153	179
Ye.I. Litvak: A Generalized Triangle-star Transformation in the Investigation of the Properties of Complex Networks	158	183

Number 2

CONTROL PROBLEMS, SYSTEMS ANALYSIS AND OPERATIONS RESEARCH		
G.Ye. Kolosov: Certain Stochastic Problems of Optimal Control with Bounded Phase Coordinates	1	3
A.D. Yudin: An Asymptotically Optimal Algorithm for Solving the Generalized Problem of Connecting Series	11	12
Ya.I. Rabinovich: On Dialogue Search for an Extremum of a Function with Undetermined Gradient	22	23
V.Ya. Larin: Problems of Distribution of Resources in Mixed Scales	31	31
E.G. Davydov and N.I. Ringo: Some Questions of the Theory of the L-Problem of Moments	40	40
A.A. Melikyan: Optimal Interaction of Two Pursuers in a Game Problem	49	49
L.A. Sholomov: A Two-Step Sequential Choice from a System of Relationships I. Polynominal Completeness of the Problem	57	72
A.A. Yaroshenko: Test Data Obtained from the Use of a Skin Analyzer in Bioengineering Control Systems	66	93
V.P. Pyatkin: The Principle of Non-Deterministic Control of a Walking Robot	72	100
QUEUEING AND RELIABILITY		
A.N. Dudin: Optimal Control of a Many-Speed Queueing System	79	109
A.V. Pechinkin: On the Choice of Optimal Instants of Reswitching in Queueing Systems	86	116
I.A. Ushakov: Methods of Approximate Solution of Dynamic Standby Problems	94	123
L.B. Groysberg: On Increasing the Efficiency of Confidence Estimation of the Reliability of Systems	102	130
I.M. Titenko: The Reliability of a Periodically Monitored System with Preventive Maintenance	113	140
COMPUTER SYSTEMS AND AUTOMATA		
A.S. Vayradyan, A.V. Korovin, and V.N. Udalov: Planning of Parallel Computations in a Multiprocessor System of Real Time	120	147
V.A. Gorbatov and N.V. Fedorov: Characterization of Logic Schemes in Unconnected Bases	129	157

	English Page	Russian Page
AUTOMATIC CONTROL		
B.N. Petrov and P.D. Krut'ko: Construction of Algorithms for Control of Flight on the Basis of Solution of the Inverse Problems of Dynamics. Longitudinal Motion	130	162
A.F. Starikov: A Method of Investigating Complex Linear Systems	140	171
K.K. Zhil'tsov and I.I. Rabinovich: Forced Motion in Automatic Control Systems of Variable Structure with Majoritary Links, II	146	176
AUTOMATION OF SCIENTIFIC RESEARCH		
N.I. Baklashov and M.V. Gal'chenko: Estimation of the Probabilistic Characteristics of Systems from the Results of Trials and Modelling	151	181
O.V. Beloglazova and V.G. Labunets: Theory and Application of the Gauss-Raider-Transformation	162	193

Number 3

OPTIMAL CONTROL AND OPTIMIZATION METHODS		
A.A. Belolipetskiy: Optimal Turning of an Aircraft with Varying Thrust Vector	1	3
V.I. Gorodetskiy and L.P. Mikhalenko: Choice of Optimal Measurement Strategy in the Case of Linear Estimation of the Parameters	12	13
M.M. Berkovich, A.S. Kleyman, and Ye.V. Yarkin: Solution of the Problem of Minimization of the Number of Equivalence Classes	18	19
A.Ye. Dmitrovskiy and V.V. Fedorov: Design of Systems of Block Structure	25	26
I.S. Litvinchev: On the Application of the Method of Benders' Expansion to the Knapsack Problem	31	32
A.R. Belkin: Models of the Distribution of Resources on Functionally Weighted Graphs	35	36
L.A. Sholomov: A Two-Step Sequential Choice on the Basis of a System of Relations II. Realization in a Special Case	40	41
ROBOTS, MANIPULATORS, ARTIFICIAL INTELLIGENCE		
I.L. Yerosh: Application of the Krestenson Transformations for Determining the Parameters of the Position of Objects from Flat Projections	45	46
V.A. Malyshev: Representation of an External Medium and Planning and Construction of Program Motions of a Manipulator	52	53
Ye.V. Aleksandrovich: Biomechanics of Human Vision Apparatus	55	56
N.N. Aprausheva: Determination of the Number of Classes in Classification Problems. I	62	71
QUEUEING AND RELIABILITY		
G.I. Falin: Investigation of Weakly Loaded Switching Systems with Repeated Calls	69	78
S.F. Yashkov: On the Ergodicity of Systems with Variable Speed of Servicing	74	83
V.A. Nagonenko: On the Characteristics of a Certain Nonstationary Queueing System. II	81	91
V.N. Brednev: Optimal Synthesis of Communications Networks According to the Criterion of Minimum Expenditures	90	100
Z.G. Garifullin: Determination of the Mean Time of Failure-Free Operation of Systems with Branching Graph of the Transitions	97	107
M.M. Mamazhonov: Determination of the Optimal Plan of Continuous Reception Monitoring	105	115

	English Page	Russian Page
AUTOMATA		
B.S. Tsirlin: Foundations of Realization of Rate-Independent Circuits	110	121
N.Kh. Aslanova and R.G. Faradzhev: Controllability and Stabilizability of Binary Nonlinear Sequential Machines	116	138
V.S. Lozovskiy: On Some Aspects of Man-Machine Dialogue	124	147
Ye.I. Litvak: Two-Sided Estimates of the Minimum Cost of a Flow in a Two-Layer Network	132	157
AUTOMATIC CONTROL		
B.N. Petrov and P.D. Krut'ko: Construction of Algorithms for Control of Flight on the Basis of Solution of the Inverse Problems of Dynamics. Lateral Motion	136	161
G.I. Vanyurikhin and V.M. Ivanov: Synthesis of Optimal Discrete Controls on the Basis of the Criterion of Generalized Work	148	173

Number 4

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
A.I. Ovseevich: Local Bellman Principle in the Optimal Control Problems	1	3
A.A. Melikyan: Necessary Conditions for Optimality on a Surface of Discontinuity of a Certain Type in a Differential Game	7	10
V.N. Lagunov: A Multistage Game of n Persons with Phase Restrictions	15	19
A.Yu. Buzin: Systems Analysis of a Developing Economy: Computation of Balanced Growth Parameters, Investigation of the Effect of Government Regulations and Modification of the Model	21	25
A.A. Shananin: Systems Analysis of a Developing Economy: The Question of Grouping of Production and Profit Functions	31	36
I.I. Erlikh: On the Possibilities of Use of a Certain Class of Convex Programming Methods in Diagonal Planning Processes	31	44
A.Ye. Dmitrovskiy and N.M. Popov: Stability Questions in a Process of Planning Complex Technological Systems	37	50
A.A. Krasovskiy and G.P. Chigin: Comparison of Recursion Algorithms of Searchless Correlationally Extremal Navigation Systems	44	58
A.G. Korotchenko: An Algorithm for Seeking the Minimum of a Function of Two Variables That Does Not Require Evaluation of the Derivatives	45	68
A.I. Kuksa and Yu.P. Laptin: The Use of Dynamic Programming in a Dual Approach to the Solution of the Problem of Calendar Planning	54	79
V.A. Vittikh, A.N. Kovartsev and M.A. Korablin: Simulation of Automated Systems with use of the Concepts of States	60	86
ROBOTS, MANIPULATORS, AND ARTIFICIAL INTELLECT		
M.A. Yemel'yanov: A Method of Analysis of Human Managerial Work by Frames and Special Modal Logic	68	94
V.N. Chumenko and A.S. Yushchenko: The Effect of a Blow on the Executive Mechanism of a Manipulational Robot	75	103
Ye.V. Rakhmanov, A.N. Strelkov and V.N. Shvedov: Development of a Mathematical Model of a Flexible Manipulator Mounted on a Moving Platform	81	109
QUEUEING AND RELIABILITY		
A.A. Zamyatin and A.D. Solov'yev: The Asymptotic Behavior of a Servicing Process in a Single-Channel System Under Conditions of a Critical Load	87	115
A.V. Pechinkin and A.G. Tatashev: Generalization of the Discipline of Advantageous Sharing of a Processor	91	120

	English Page	Russian Page
G.I. Falin: On the Ergodicity of a Certain Model of Plural Access into a Wide-Band Broadcasting Channel	96	126
L.V. Nazarov: A Queueing System with Orientation	97	131
V.A. Ivnitskiy: A Condition Under Which the Stationary Probabilities of the States of an Open Network of Single-Line Systems with Losses are Independent of the Form of the Distributions of the Durations of Servicing	101	136
V.V. Ivlev: The Use of Diffusion Processes in the Analysis of Reliability	105	141
COMPUTER SYSTEMS AND AUTOMATA		
Yu.Asaf'yev, A.M. Boykevich, V.L. Volchek and A.P. Goryashko: Construction of Devices Suitable for Monitoring Control Dictation of Integral Technology	111	146
N.A. Starodubtsev: Autonomous, Antitone, Sequential Circuits. I. Definitions and Interpretation	111	155
A.R. Eyvazov: Development of a Plan of Loading a Computer Center of Collective Use	116	162
L.N. Timonov: Distribution of the Resource of Productivity of a Digital Computer of Automated Control Systems	117	166
G.T. Artamonov and S.V. Yablonskiy: The Influence of a Queue Accumulator of the Transmission Capacity of the Input-Output System of a Computer	123	174
S.V. Smelyakov and Yu.G. Stoyan: A Mathematical Model of Certain Problems of Optimization on Paths	128	180
AUTOMATIC CONTROL		
L.B. Pavlov: The Problem of Determining the Boundary States of Dynamic Systems	136	189
B.N. Petrov, V.V. Dement'yeva and M.M. Khrustalev: Synthesis of an Invariant Dynamic System with Program Control	148	202

Number 5

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
A.A. Krasovskiy: Variational Filters and Optimization According to the Criterion of Generalized Work	1	3
V.I. Tsurkov: Optimization of Multidimensional Systems with Distributed Parameters	9	13
T.M. Vinogradskaya and A.A. Rubinskiy: Quasicoordinate Relations in the Problem of Choosing Alternatives	17	22
N.K. Luk'yanov: Grouping in Simulational Models of Ecological Systems	24	30
RELIABILITY AND QUEUEING		
A.D. Solov'yev and A.A. Shakhbazov: Nonhomogeneous Standby with Renewal	30	36
I.V. Pavlov: On the Correctness of the Fiducial Approach in the Construction of Confidence Limits for Indices of Reliability of Complex Systems	38	46
V.M. Abramov: Some Limit Theorems for a Single-Channel System the Intensity of Serving which Depends on the Queue Length	44	53
L.G. Afanas'yeva and E.V. Bulinskaya: Storage Capacity Optimization	49	58
A.G. Tatashev and A.I. Ushakov: A Problem of Reswitching Standby Elements According to a Schedule	57	68
AUTOMATA AND COMPUTER SYSTEMS		
N.P. Viktorova: Methods of Generalizing and Classifying Layer Structures of a Special Form	65	77
N.A. Starodubtsev: Autonomous Antitone Sequential Schemes. II. Cyclograms and Their Properties	74	87

	English Page	Russian Page
I.V. Nevskiy, S.M. Osadchiy and S.V. Solntsev; Determination of Distances to Visible Points of Bodies in a System of Visual Perception	80	94
M.Sh. Levin: An Extremal Problem of Organization of Data	87	103
ARTIFICIAL INTELLIGENCE AND ROBOTS		
Yu.A. Bukhshtab, A.I. Gorlin, S.S. Kamynin, D.A. Koryagin, and E.Z. Lyubimskiy: An Intellectural Package that Uses Knowledge of an Object Region and Functional Models in the Planning of Computations.	96	113
S.K. Dulin: A Variant of Algorithmic Programming of a System of Visual Perception of an Assembling Robot	96	125
M. Vukobratovic and V. Potkonyak: A Numerical Method of Simulating the Dynamics of a Manipulator with Elastic Properties	101	131
F.L. Chernous'ko: The Dynamics of Controlled Motions of an Elastic Manipulator	101	142
N.N. Aprausheva: On the Determination of the Number of Classes in Classification Problems. II	111	153
DATA PROCESSING		
O.N. Kolesnikova and N.V. Khovanov: On the Possibility of Linear Representation of an Arbitrary Space of Images	118	161
A.I. Zhdanov and O.A. Katsyuba: On Consistent Estimates of the Solutions of Ill-Posed Stochastic Algebraic Equations in the Identification of the Parameters of Linear Difference Operators	121	165
AUTOMATIC CONTROL		
S.V. Emelyanov and S.K. Korovin: An Extension of the Set of Types of Feedbacks and Their Application in Construction of Closed Dynamical Systems	128	173
V.P. Puzanov: The Problem of Estimation of the State Vector of a Linear Dynamic System	137	184
V.P. Kolesnik and V.V. Solodovnikov: A Method of Synthesizing Optimal Systems, as Regards Response Speed, for Controlling High-Order Objects with Bounded Phase Coordinates	142	189
BRIEF COMMUNICATIONS		
Yu.Ye. Khramov: Reduction of Matrices to Block-Diagonal Form	143	202
E.M. Khazen: A Numerical Method of Estimation of Information Losses in the Compression of Observed Data or Simplification of the Description of Random Processes	145	204
A.I. Polyakov: Mathematical Programming of Planning of Remote Irradiation Therapy	150	209
A.F. Blishun and D.I. Shapiro: Decision Making on the Basis of a Linguistic Representation of Situational Data and Criteria	151	211

Number 6

SYSTEMS ANALYSIS AND OPTIMAL CONTROL		
A.D. Yudin: Complexity of Estimation of Statistical Systems	1	3
V.P. Ofitserov and N.B. Sudzilovskiy: On One Type of Linear Programming Problem and the Solution of Such Problems	10	14
G.V. Gens: Problems with Fixed Payments and Efficient Approximate Algorithms for Solving Them	14	18
T.V. Kobzeva: A Problem of Optimization in the Layouts of Various Components	23	29
M.A. Rodionov: Direct Interconnections in the Stochastic Systems	23	39
A.P. Krutov and I.G. Pospelov: On the System Analysis of a Developing Economy: The Effect of the Banking System	31	48

	English Page	Russian Page
QUEUEING AND RELIABILITY		
V.A. Gadasin: Distribution of the Maximal Flow in a Recurrent Dipole Network with Communication Channels of Random Transmission Capacity	43	60
V.V. Ivlev: Determination of the Parameters of the Generalized Laguerre Polynomials in Reliability Problems	51	68
V.B. Ilyushin and Yu.V. Solodyannikov: Estimation of the Distribution of the Total Duration of Servicing in a Single-Channel Queueing System of General Form	55	73
COMPUTER SYSTEMS AND AUTOMATA		
N.A. Starodubtsev: Autonomous Antitone Sequential Circuits. III. Minimization	63	82
T. Krupa: Characterization in Design of Control Automata	68	87
L.S. Bershteyn and V.A. Saprykin: Minimization of the Longest Connections in the Case of a Linear Arrangement of the Network Elements	74	94
G.S. Osipov: Two Problems from the Theory of Semiotic Control Models I. Representations of Semiotic Models	79	100
ARTIFICIAL INTELLECT, ROBOTS AND MANIPULATORS		
P.D. Krut'ko and Ye.P. Popov: Motion Control of the Manipulating Robots Based on Second-Order Kinematic Algorithms	89	111
A.V. Kalyayev, V.P. Noskov and Yu.V. Chernukhin: Homogeneous Control Structure for an Adaptive Robot-Manipulator	98	121
O.V. Yeveyev and K.A. Pupkov: Minimal Image of the External Environment Model in Problems of the Stimulation-Reaction Decision Making for the Special-Purpose Robotic Systems	104	127
M.V. Donskoy: Results of the Third World Tournament on Chess Programs	108	133
AUTOMATIC CONTROL		
S.V. Yemel'yanov, S.K. Korovin and V.I. Sizikov: Principles of Contruction of Control Systems with Integral Coordinate-Parametric Feedback and Their Properties	109	140
A.Ye. Dubin: A Method of Solving an Algebraic Riccati Equation for the Problem of Analytical Construction of a Regulator	121	153
M.I. Gil': Stability in the Large of Nonlinear Nonstationary Systems	125	158
N.V. Saburov: Principle of Multicomponent Control of a Nonstationary Object	130	163
